

THIS TERM SO FAR!

Meetings this term have been quite well attended and have included a look at Schumacher and his 'Small Is Beautiful' theories, an idea which is taken up (on a small scale!!) by the local Tools for Self-Reliance group, who refurbish tools to send to the Third World. (Offers of help gratefully received!) Last Friday Andy Scott, from the Merseyside World Development Studies Centre, outlined how the problems of the poor on Merseyside are similar in many ways to those of the poor in the countries of the South, and how the Multi-National Companies have so much influence in the North and South.
